VEGRA Group

1979 – 2016

From the very beginning – which means for almost 40 years now - the objective of **VEGRAs** development work has been to create **ecological and resource-conserving products with low emissions** for the graphic industry.

VEGRA is a pioneer for **reducing VOC-contents in the press room.**

VEGRA product highlights:

- VOC-free, oil based cleaning agents for heatset web offset printing
- Oil based cleaning agents with only 8 % VOC content for sheet fed offset
- CO₂-credits for customers who participate in the VEGRA recycling program
- VOC-free cleaning agents for dispersion coatings and UV coatings
- Water based dispersion coatings for food packagings
- VOC-free fountain solutions – tested for corrosion and approved by FOGRA for the printing press manufacturers (manroland, KBA, Heidelberger)
- Fountain solutions for alcohol-free printing

Better printing and coating with VEGRA products!

**VEGRA stands for environmental protection and
for conserving the resources of our planet**
